ONE ROCK FUND SUMMARY

INVESTMENT OBJECTIVE:

The One Rock Fund (the “Fund”) seeks capital appreciation.

The Fund may change its investment objectives without shareholder approval, although it has no current intention to do so. Shareholders will be provided with at least 60 days’ prior written notice of any change to the Fund’s investment objectives.

FEES AND EXPENSES OF THE FUND:

This table describes the fees and expenses that you may pay if you buy and hold shares of the Fund.

Shareholder Fees (fees paid directly from your investment)	
Maximum Sales Charge (Load) Imposed on Purchases (as a % of offering price)	None
Maximum Deferred Sales Charge (Load) (as a % of original purchase price)	None
Maximum Sales Charge (Load) Imposed on Reinvested Dividends and other Distributions	None
Redemption Fee (as a % of amount redeemed, if sold within 60 days)	None
Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)	
Management Fees	1.00%
Other Expenses	0.81%
Acquired Fund Fees and Expenses ⁽¹⁾	0.01%
Total Annual Fund Operating Expenses	1.82%
Fee Waiver and/or Expense Reimbursement ⁽²⁾	(0.05)%
Total Annual Fund Operating Expenses After Fee Waiver and/or Expense Reimbursement	1.77%

(1) Acquired Fund Fees and Expenses are the indirect costs of investing in other investment companies. The operating expenses in this fee table will not correlate to the expense ratio in the Fund’s financial highlights because the financial statements include only the direct operating expenses incurred by the Fund.

(2) The Fund’s Adviser (defined below) has contractually agreed to reduce its fees and to reimburse expenses, at least through December 31, 2024, to ensure that total annual Fund operating expenses after fee waiver and reimbursement (exclusive of any acquired fund fees and expenses, interest expenses, dividend expenses on short sales, taxes, brokerage commissions, expenses incurred in connection with any merger or reorganization, or extraordinary expenses such as litigation) will not exceed 1.75% of the average daily net assets attributable to the Institutional Class shares. These fee waivers and expense reimbursements are subject to possible recoupment from the Fund within three years of the date on which the waiver or reimbursement occurs, if such recoupment can be achieved within the lesser of the foregoing expense limits or the expense limits in place at the time of recoupment. This agreement may be terminated only by the Fund’s Board of Trustees, on 60 days written notice to the Fund’s Adviser.

Example: This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds.

The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Fund’s operating expenses remain the same as those reflected in the above fee table. The Example assumes the impact of the fee waiver in 1 Year example. Although your actual costs may be higher or lower, based upon these assumptions your costs would be:

1 Year	3 Years	5 Years	10 Years
\$179	\$567	\$980	\$2,132

Portfolio Turnover: The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual operating expenses or in the Example, affect the Fund’s performance. During the most recent fiscal year ended November 30, 2023, the Fund’s portfolio turnover rate was 676.38% of the average value of its portfolio.

PRINCIPAL INVESTMENT STRATEGY:

To achieve the Fund’s investment objectives, Wrona Investment Management, LLC (the “Adviser”) invests primarily in publicly traded common stocks of any capitalization. The Adviser may also invest in stock options, stock index futures, and stocks of foreign and emerging market issuers listed on U.S. exchanges. The Fund defines emerging market issuers to be those found in the MSCI Emerging Markets Index. The Adviser may engage in short sales of common stocks.

The Fund invests in the common stock of companies that are experiencing “business momentum”. The Adviser considers a company to have business momentum if its business conditions, in the Adviser’s opinion, are generally improving from its recent past or are likely to improve shortly. The Adviser employs a bottom-up, fundamental research approach to each company and industry with a technical analysis overlay to gain a better understanding of

investor sentiment and potential future risks. The Adviser expects that many, or possibly all, of these companies will be in the technology sector and exhibit strong growth in revenues, earnings and/or cash flows, although significant investments may also be made in other sectors.

The Fund will sell a security when the Adviser believes that the underlying reasons for the purchase are no longer valid. Such reasons may include significant price appreciation, an adverse change in business conditions for the company, loss of market share or heightened competition or any event(s) that causes a company to lose its business momentum, and/or better investment opportunities in other companies. The Adviser may engage in frequent transactions for the Fund resulting in a high portfolio turnover rate.

The Fund may actively use covered calls and covered puts on individual securities. A covered call is owning a stock while simultaneously being short (also known as writing) a call option(s) on the same stock. A covered put is being short a stock while simultaneously being short (also known as writing) a put option(s) on the same stock. Both strategies are meant to reduce portfolio volatility and reduce downside risk relative to owning a stock or being short a stock without the corresponding covered call option or put option. The Adviser may use these strategies during periods of heightened individual company risks.

The Adviser may employ a short straddle or short strangle stock option strategy. A short straddle is being short (also known as writing) a call option(s) and put option(s) at the same strike price on the same stock. A short strangle is being short (also known as writing) a call option(s) and a put option(s) at different strike prices on the same stock. Both strategies benefit if the underlying stock is not as volatile over the holding period as the options market is currently pricing. The Adviser will only make use of option strategies where the underlying security is one in which the Fund normally would invest.

The Fund may buy or sell stock index futures to increase exposure to the broad equity market, hedge market exposure of an existing portfolio, or decrease overall market exposure. The Adviser may invest in stock index futures in this way to achieve a desired portfolio stock, or stock equivalent, exposure.

The Fund also invests in short-term opportunities through the trading of common stocks and/or stock index futures in situations that the Adviser believes to be a market overreaction to recently disclosed public news. Such situations can be caused for many reasons including earnings reports, analyst rating changes, competitor changes in business outlook, secondary stock offerings, industry headline news, extraordinary events, economic reports or monetary actions. In these circumstances, business momentum may not be a factor and the expectation is for a short-term trade.

The Adviser's investment process seeks to exclude direct investment for the Fund in the securities issued by any company that is involved in the production or wholesale distribution of alcohol, tobacco, vaping equipment, gambling equipment, gambling enterprises, pornography, or which provide products or services that do not allow the right to life at all stages. By buying stock index futures, the Adviser may be indirectly investing in these securities.

The Fund is "non-diversified", meaning it can invest in fewer securities at any one time than a "diversified" fund.

PRINCIPAL INVESTMENT RISKS:

As with all mutual funds, there is risk that you could lose money through your investment in the Fund. Investing in the Fund can result in a loss of some or all amounts invested. Below are the main risks of investing in the Fund. All of the risks listed below are material to the Fund, regardless of the order in which they appear.

Emerging Markets Risk: Investing in emerging markets involves not only the risks described below with respect to investing in foreign securities, but also other risks, including exposure to economic structures that are generally less diverse and mature, limited availability and reliability of information material to an investment decision, and exposure to political systems that can be expected to have less stability than those of developed countries. The market for the securities of issuers in emerging market typically is small, and a low or nonexistent trading volume in those securities may result in a lack of liquidity and price volatility.

Equity Risk: Equity security values held by the Fund may fall due to general market and economic conditions, perceptions regarding the industries in which the issuers of the securities participate or other factors relating to the companies.

Foreign Securities Risk: Changes in foreign economies and political climates are more likely to affect the Fund than a mutual fund that invests exclusively in U.S. companies. Foreign companies are generally not subject to the same regulatory requirements of U.S. companies thereby resulting in less publicly available information about these companies. In addition, foreign accounting, auditing and financial reporting standards generally differ from those applicable to U.S. companies.

Futures Risk: The Fund's use of futures involves risks different from, or possibly greater than, the risks associated with investing directly in securities and other traditional investments. These risks include (i) leverage risk (ii) risk of mispricing or improper valuation; and (iii) the risk that changes in the value of the futures contract may not correlate perfectly with the underlying index. Investments in futures involve leverage, which means a small percentage of assets invested in futures can have a disproportionately large impact on the Fund. This risk could cause the Fund to lose more than the principal amount invested. Futures contracts may become mispriced or improperly valued when compared to the Adviser's expectation and may not produce the desired investment results. Additionally, changes in the value of futures contracts may not track or correlate perfectly with the underlying index because of temporary, or even long-term, supply and demand imbalances and because futures do not pay dividends unlike the stocks upon which they are based.

Hedging Risk: Hedging is a strategy in which the Fund uses an option to offset the risks associated with other Fund holdings. There can be no assurance that the Fund's hedging strategy will reduce risk or that hedging transactions will be either available or cost effective. The Fund is not required to use hedging and may choose not to do so.

Investment Risk: You could lose money by investing in the Fund. An investment in the Fund is not a deposit to a bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency.

Large-Capitalization Risk: Larger, more established companies may be unable to attain the high growth rates of successful, smaller companies during periods of economic expansion.

Leverage Risk: By investing the proceeds received from selling securities short, the Fund could be deemed to be facing special risks. This technique may increase the Fund's exposure to long equity positions and make any change in the Fund's net asset value greater than it would be without the use of such a technique. This could result in increased volatility of returns. There is no guarantee that the Fund will thus indirectly leverage its portfolio, or if it does, that the Fund's strategy will be successful.

Management Risk: The Fund is an actively managed portfolio. The Adviser will apply investment techniques and risk analyses in making investment decisions for the Fund, but there can be no guarantee that the Fund will achieve its investment objective. The Adviser may fail to use derivatives effectively or may select investments that do not perform as anticipated by the Adviser. Imperfections, errors or limitations in investment research used by the Adviser as part of its investment process could affect the Fund's performance. The Fund may not perform as well as other funds because the Adviser may select and exclude certain securities for reasons other than performance. The Fund may not perform as well as other funds because the Adviser may select and exclude securities for reasons other than performance. The Fund could lose value or its investment results could lag relevant benchmarks or other funds with similar objectives.

Market and Geopolitical Risk: Market risk includes the possibility that the Fund's investments will decline in value because of a downturn in the stock market, reducing the value of individual companies' stocks regardless of the success or failure of an individual company's operations. The value of your investment in the Fund is based on the market prices of the securities the Fund holds. These prices change daily due to economic and other events that affect markets generally, as well as those that affect particular regions, countries, industries, companies or governments. The increasing interconnectivity between global economies and financial markets increases the likelihood that events or conditions in one region or financial market may adversely impact issuers in a different country, region or financial market. Securities in the Fund's portfolio may underperform due to inflation (or expectations for inflation), interest rates, global demand for particular products or resources, natural disasters, pandemics, epidemics, terrorism, regulatory events and governmental or quasi-governmental actions. The occurrence of global events similar to those in recent years, such as terrorist attacks around the world, natural disasters, social and political discord or debt crises and downgrades, among others, may result in market volatility and may have long term effects on both the U.S. and global financial markets. There is a risk that you may lose money by investing in the Fund.

Non-Diversification Risk: The Fund is non-diversified. This means that it may invest a larger portion of its assets in a limited number of companies than a diversified fund. Because a relatively high percentage of the Fund's assets may be invested in the securities of a limited number of companies that could be in the same or related economic sectors, the Fund's portfolio may be more susceptible to any single economic, technological or regulatory occurrence than the portfolio of a diversified fund.

Options Risk: The Fund may lose the entire put option premium paid if the underlying security does not decrease in value at expiration. Put options may not be an effective hedge against a decrease in the value of the Fund's portfolio of securities because they may have imperfect correlation to the value of the Fund's portfolio securities. Purchased put options may decline in value due to changes in price of the underlying security, passage of time and changes in volatility. Written call and put options may limit the Fund's participation in equity market gains and may magnify the losses if the price of the written option instrument increases in value between the date when the Fund writes the option and the date on which the Fund purchases an offsetting position. The Fund will incur a loss as a result of a written options (also known as a short position) if the price of the written option instrument increases in value between the date when the Fund writes the option and the date on which the Fund purchases an offsetting position.

Regulatory Risk: Regulatory authorities in the United States or other countries may restrict the ability of the Fund to fully implement its short-selling strategy, either generally, or with respect to certain industries or countries, which may impact the Fund's ability to fully implement its investment strategies.

Short Sales Risk: If a security sold short increases in price, the Fund may have to cover its short position at a higher price than the short sale price, resulting in a loss. The Fund may have substantial short positions and must borrow those securities to make delivery to the buyer. The Fund may not be able to borrow a security that it needs to deliver or it may not be able to close out a short position at an acceptable price and may have to sell related long positions before it had intended to do so. Thus, the Fund may not be able to successfully implement its short sale strategy due to limited availability of desired securities. The Fund may be required to pay a premium and other transaction costs, which would increase the cost of the security sold short. The amount of any gain will be decreased, and the amount of any loss increased, by the amount of the premium, dividends, interest or expenses the Fund may be required to pay in connection with the short sale. Until the Fund replaces a borrowed security, it is required to maintain a segregated account of cash or liquid assets with a broker or custodian to cover the Fund's short position. Generally, securities held in a segregated account cannot be sold unless they are replaced with other liquid assets. The Fund's ability to access the pledged collateral may also be impaired in the event the broker fails to comply with the terms of the contract. In such instances the Fund may not be able to substitute or sell the pledged collateral. Additionally, the Fund must maintain sufficient liquid assets (less any additional collateral pledged to the broker), marked-to-market daily, to cover the short sale obligations. This may limit the Fund's investment flexibility, as well as its ability to meet redemption requests or other current obligations. Because losses on short sales arise from increases in the value of the security sold short, such losses are theoretically unlimited.

Small- and Mid-Capitalization Stock Risk: To the extent that the Fund invests in the stocks of small and mid-sized companies, the Fund may be subject to additional risks. The earnings and prospects of these companies are more volatile than larger companies. Smaller-sized companies may experience higher failure rates than larger companies. Smaller-sized companies normally have a lower trading volume than larger companies, which may tend to make their market price fall disproportionately to larger companies in response to selling pressures. Smaller-sized companies may have limited markets, product lines or financial resources and may lack management experience.

Technology Sector Risk: Technology companies face intense competition, both domestically and internationally, which may have an adverse effect on profit margins. Technology companies may have limited product lines, markets, financial resources or personnel. The products of technology companies may face obsolescence due to rapid technological developments and frequent new product introduction, unpredictable changes in growth rates and competition for the services of qualified personnel. Companies in the technology sector are heavily dependent on patent and intellectual property rights. The loss or impairment of these rights may adversely affect the profitability of these companies.

Turnover Risk: A higher portfolio turnover will result in higher transactional and brokerage costs. Active trading of securities may also increase the Fund's realized capital gains or losses, which may affect the taxes you pay as a Fund shareholder.

COVID-19 Risk: An outbreak of infectious respiratory illness caused by the novel coronavirus known as COVID-19 has resulted in travel restrictions, closed international borders, enhanced health screenings, disruption and delays in healthcare services, prolonged quarantines, cancellations, temporary store closures, social distancing, government ordered curfews and business closures, disruptions to supply chains and consumer activity, shortages, highly volatile financial markets, and general concern and uncertainty.

PERFORMANCE:

The bar chart and performance table below show the variability of the Fund's returns, which is some indication of the risks of investing in the Fund. The bar chart shows performance of the Fund's shares for each full calendar year since the Fund's inception. The performance table compares the performance of the Fund's shares over time to the performance of a broad-based securities market index. You should be aware that the Fund's past performance (before and after taxes) may not be an indication of how the Fund will perform in the future. Updated performance information is available at no cost by visiting www.onerockfund.com or by calling 1-800-564-3899.

Best Quarter:	March 31, 2023	22.93%
Worst Quarter:	June 30, 2022	-30.10%

Performance Table
Average Annual Total Returns
(For periods ended December 31, 2023)

	1 year	Since Inception*
Return before taxes	72.41%	29.62%
Return after taxes on distributions	72.41%	24.32%

After-tax returns are calculated using the highest historical individual federal marginal income tax rate and do not reflect the impact of state and local taxes. Actual after-tax returns depend on a shareholder's tax situation and may differ from those shown. The after-tax returns are not relevant if you hold your Fund shares in tax-deferred arrangements, such as 401(k) plans or individual retirement accounts ("IRA").

INVESTMENT ADVISER:

Wrona Investment Management, LLC is the Fund's investment adviser.

PORTFOLIO MANAGER:

Jeffrey Wrona - has been the portfolio manager of the Fund since its inception in March 2020. He founded Wrona Investment Management, LLC in 2019 and serves as the firm's President, Portfolio Manager, and CCO.

PURCHASE AND SALE OF FUND SHARES:

You may purchase and redeem shares of the Fund on any day that the New York Stock Exchange is open for trading. You may redeem shares by written request, telephone or through a financial intermediary.

Initial Investment \$2,000 initial; \$100 subsequent investments;
Retirement Plans \$2,000 initial; \$100 subsequent investments

However, the Fund or the adviser may waive any minimum investment requirement at its discretion.

TAX INFORMATION:

Dividends and capital gain distributions you receive from the Fund, whether you reinvest your distributions in additional Fund shares or receive them in cash, are taxable to you at either ordinary income or capital gains tax rates unless you are investing through a tax-deferred plan such as an IRA or 401(k) plan. However, such distributions may be taxed later upon withdrawal of monies from the plan.

PAYMENTS TO BROKER-DEALERS AND OTHER FINANCIAL INTERMEDIARIES:

If you purchase the Fund through a broker-dealer or other financial intermediary (such as a bank), the adviser may pay the intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary's website for more information.

ADDITIONAL INFORMATION ABOUT THE FUND'S PRINCIPAL INVESTMENT STRATEGIES AND RELATED RISKS

INVESTMENT OBJECTIVES:

The Fund seeks capital appreciation.

The Fund may change its investment objectives without shareholder approval, although it has no current intention to do so. Shareholders will be provided with at least 60 days' prior written notice of any change to the Fund's investment objectives.

PRINCIPAL INVESTMENT STRATEGY:

To achieve the Fund's investment objectives, Wrona Investment Management, LLC (the "Adviser") invests primarily in publicly traded common stocks of any market capitalization. The Adviser may also invest in:

- stock options;
- stock index futures; and
- foreign stocks listed on U.S. exchanges, including those which may be domiciled in "emerging market" countries;

The Adviser may engage in short sales of common stocks.

The Fund is "non-diversified", meaning it can invest in fewer securities at any one time than "diversified" portfolios and normally concentrates its investments in common stocks, which can be of any market capitalization. The Adviser expects that many, or possibly all, of these companies will be in the technology sector and exhibit strong growth in revenues, earnings and/or cash flows, although significant investments may also be made in other sectors.

The Fund invests in the common stock of companies that are experiencing "business momentum". The Fund defines business momentum to mean companies with business conditions that are, in the Adviser's opinion, generally improving from its recent past or are likely to improve shortly. The Adviser employs a bottom-up, fundamental research approach to each company and industry with a technical analysis overlay to gain a better understanding of investor sentiment and potential future risks.

The Fund will sell a security when the Adviser believes that the underlying reasons for the purchase are no longer valid. Such reasons may include significant price appreciation, an adverse change in business conditions for the company, loss of market share or heightened competition or any event(s) that causes a company to lose its business momentum, and/or better investment opportunities in other companies. The Adviser may engage in frequent transactions for the Fund resulting in a high portfolio turnover rate.

The Fund may actively use covered calls and covered puts on individual securities. A covered call is owning a stock while simultaneously being short (also known as writing) a call option(s) on the same stock and a covered put is being short a stock while simultaneously being short (also known as writing) a put option(s) on the same stock. Both strategies are meant to reduce portfolio volatility and reduce downside risk relative to owning a stock or being short a stock without the corresponding covered call option or put option. These strategies may be used during periods of heightened individual company risks.

The Adviser may employ a short straddle or short strangle stock option strategy. A short straddle is being short (also known as writing) a call option(s) and put option(s) at the same strike price of the same stock while a short strangle is being short (also known as writing) a call option(s) and a put option(s) at different strike prices of the same stock. Both strategies benefit if the underlying stock is not as volatile over the holding period as the options market is currently pricing. The Adviser will only make use of option strategies where the underlying security is within that which the Fund normally invests.

The Fund may buy or sell stock index futures to increase exposure to the broad equity market, hedge market exposure of an existing portfolio, or decrease overall market exposure. The Adviser may invest in stock index futures in this way to achieve a desired portfolio stock, or stock equivalent, exposure.

The Fund also invests in short-term opportunities through the trading of common stocks and/or stock index futures in situations that the Adviser believes to be a market overreaction to recently disclosed public news. Such situations can be caused for many reasons including earnings reports, analyst rating changes, competitor changes in business outlook, secondary stock offerings, industry headline news, extraordinary events, economic reports or monetary actions. In these circumstances, business momentum may not be a factor and the expectation is for a short-term trade.

The Adviser's investment process seeks to exclude direct investment for the Fund in the securities issued by any company that is involved in the production or wholesale distribution of alcohol, tobacco, vaping equipment, gambling equipment, gambling enterprises, pornography, or which provide products or services that do not allow the right to life at all stages. By buying stock index futures, the Adviser may be indirectly investing in these securities.

PRINCIPAL INVESTMENT RISKS:

As with all mutual funds, there is risk that you could lose money through your investment in the Fund. Investing in the Fund can result in a loss of some or all amounts invested. Below are the main risks of investing in the Fund. All of the risks listed below are material to the Fund, regardless of the order in which they appear.

Emerging Markets Risk: The Fund may invest in countries with newly organized or less developed securities markets. Investments in emerging markets typically involves greater risks than investing in more developed markets. Generally, economic structures in these countries are less diverse and mature than those in developed countries and their political systems tend to be less stable. Emerging market countries may have different regulatory, accounting, auditing, and financial reporting and record keeping standards and may have material limitations on PCAOB inspection, investigation, and enforcement. Therefore, the availability and reliability of information, particularly financial information, material to an investment decision in emerging market companies may be limited in scope and reliability as compared to information provided by U.S. companies. Emerging market economies may be based on only a few industries. As a result, security issuers, including governments, may be more susceptible to economic weakness and more likely to default. Emerging market countries also may have relatively unstable governments, weaker economies, and less-developed legal systems with fewer security holder rights. Investments in emerging markets countries may be affected by government policies that restrict foreign investment in certain issuers or industries. The potentially smaller size of securities markets in emerging market countries and lower trading volumes can make investments relatively illiquid and potentially more volatile than investments in developed countries, and such securities may be subject to abrupt and severe price declines. Due to this relative lack of liquidity, the Fund may have to accept a lower price or may not be able to sell a portfolio security at all. An inability to sell a portfolio position can adversely affect a Fund's value or prevent a Fund from being able to meet cash obligations or take advantage of other investment opportunities.

Equity Risk: Equity securities are susceptible to general stock market fluctuations and to volatile increases and decreases in value. The equity securities held by the Fund may experience sudden, unpredictable drops in value or long periods of decline in value. This may occur because of factors affecting securities markets generally, the equity securities of a particular sector, or a particular company.

Foreign Securities Risk: Changes in foreign economies and political climates are more likely to affect the Fund more than a mutual fund that invests exclusively in U.S. companies. There may also be less government supervision of foreign markets, resulting in non-uniform accounting practices and less publicly available information. The values of foreign investments may be affected by changes in exchange control regulations, application of foreign tax laws (including withholding tax), changes in governmental administration or economic or monetary policy (in this country or abroad) or changed circumstances in dealings between nations. In addition, foreign brokerage commissions, custody fees and other costs of investing in foreign securities are generally higher than in the United States. Investments in foreign companies, particularly in less developed markets, could be affected by other factors not present in the U.S., including expropriation, armed conflict, confiscatory taxation, and potential difficulties in enforcing contractual obligations. As a result, the Fund may be exposed to greater risk and will be more dependent on the adviser's ability to assess such risk than if the Fund invested solely in the U.S. or more developed foreign markets.

Futures Risk: The Fund's use of futures involves risks different from, or possibly greater than, the risks associated with investing directly in securities and other traditional investments. These risks include (i) leverage risk (ii) risk of mispricing or improper valuation; and (iii) the risk that changes in the value of the futures contract may not correlate perfectly with the underlying index. Investments in futures involve leverage, which means a small percentage of assets invested in futures can have a disproportionately large impact on the Fund. This risk could cause the Fund to lose more than the principal amount invested. Futures contracts may become mispriced or improperly valued when compared to the Adviser's expectation and may not produce the desired investment results. Additionally, changes in the value of futures contracts may not track or correlate perfectly with the underlying index because of temporary, or even long-term, supply and demand imbalances and because futures do not pay dividends unlike the stocks upon which they are based.

Hedging Risk: Hedging is a strategy in which the Fund uses an option to offset the risks associated with other Fund holdings. There can be no assurance that the Fund's hedging strategy will reduce risk or that hedging transactions will be either available or cost effective. The Fund is not required to use hedging and may choose not to do so.

Investment Risk: You could lose money by investing in the Fund. An investment in the Fund is not a deposit to a bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency.

Large-Capitalization Risk: Large-capitalization companies may be less able than smaller capitalization companies to adapt to changing market conditions. Large-capitalization companies may be more mature and subject to more limited growth potential compared with smaller capitalization companies. During different market cycles, the performance of large capitalization companies has trailed the overall performance of the broader securities markets.

Leverage Risk: By investing the proceeds received from selling securities short, the Fund could be deemed to be facing special risks. This technique may increase the Fund's exposure to long equity positions and make any change in the Fund's net asset value greater than it would be without the use of such a technique. This could result in increased volatility of returns. There is no guarantee that the Fund will thus indirectly leverage its portfolio, or if it does, that the Fund's strategy will be successful.

Management Risk: The Fund is an actively managed portfolio. The Adviser will apply investment techniques and risk analyses in making investment decisions for the Fund, but there can be no guarantee that the Fund will achieve its investment objective. The Adviser may fail to use derivatives effectively or may select investments that do not perform as anticipated by the Adviser. Imperfections, errors or limitations in investment research used by the Adviser as part of its investment process could affect the Fund's performance. The Fund may not perform as well as other funds because the Adviser may select and exclude certain securities for reasons other than performance. The Fund could lose value or its investment results could lag relevant benchmarks or other funds with similar objectives.

Market and Geopolitical Risk: The prices of securities held by the Fund may decline in response to certain events taking place around the world, including those directly involving the companies whose securities are owned by the Fund; conditions affecting the general economy; overall market changes; local, regional or global political, social or economic instability; and currency, interest rate and commodity price fluctuations. The securities purchased by the Fund may involve large price swings and potential for loss. Investors in the Fund should have a long-term perspective and be able to tolerate potentially sharp declines in value. The market's daily movements, sometimes called volatility, may be greater or less depending on the types of securities the Fund owns and the markets in which the securities trade. The increasing interconnectivity between global economies and financial markets increases the likelihood that events or conditions in one region or financial market may adversely impact issuers in a different country, region or financial market. Securities in the Fund's portfolio may underperform due to inflation (or expectations for inflation), interest rates, global demand for particular products or resources, natural disasters, pandemics, epidemics, terrorism, regulatory events and governmental or quasi-governmental actions. The occurrence of global events similar to those in recent years, such as terrorist attacks around the world, natural disasters, social and political discord or debt crises and downgrades, among others, may result in market volatility and may have long term effects on both the U.S. and global financial markets. The value and growth-oriented equity securities purchased by the Fund may experience large price swings and potential for loss.

Non-Diversification Risk: The Fund is non-diversified. This means that it may invest a larger portion of its assets in a limited number of companies than a diversified fund. Because a relatively high percentage of the Fund's assets may be invested in the securities of a limited number of companies that could be in the same or related economic sectors, the Fund's portfolio may be more susceptible to any single economic, technological or regulatory occurrence than the portfolio of a diversified fund.

Options Risk: The Fund may lose the entire put option premium paid if the underlying security does not decrease in value at expiration. Put options may not be an effective hedge against a decrease in the value of the Fund's portfolio of securities because they may have imperfect correlation to the value of the Fund's portfolio securities. Purchased put options may decline in value due to changes in price of the underlying security, passage of time and changes in volatility. Written call and put options may limit the Fund's participation in equity market gains and may magnify the losses if the price of the written option instrument increases in value between the date when the Fund writes the option and the date on which the Fund purchases an offsetting position. The Fund will incur a loss as a result of a written options (also known as a short position) if the price of the written option instrument increases in value between the date when the Fund writes the option and the date on which the Fund purchases an offsetting position.

Regulatory Risk: Regulatory authorities in the United States or other countries may restrict the ability of the Fund to fully implement its short-selling strategy, either generally, or with respect to certain industries or countries, which may impact the Fund's ability to fully implement its investment strategies.

Short Sales Risk: If a security sold short increases in price, the Fund may have to cover its short position at a higher price than the short sale price, resulting in a loss. The Fund may have substantial short positions and must borrow those securities to make delivery to the buyer. The Fund may not be able to borrow a security that it needs to deliver or it may not be able to close out a short position at an acceptable price and may have to sell related long positions before it had intended to do so. Thus, the Fund may not be able to successfully implement its short sale strategy due to limited availability of desired securities. The Fund may be required to pay a premium and other transaction costs, which would increase the cost of the security sold short. The amount of any gain will be decreased, and the amount of any loss increased, by the amount of the premium, dividends, interest or expenses the Fund may be required to pay in connection with the short sale. Until the Fund replaces a borrowed security, it is required to maintain a segregated account of cash or liquid assets with a broker or custodian to cover the Fund's short position. Generally, securities held in a segregated account cannot be sold unless they are replaced with other liquid assets. The Fund's ability to access the pledged collateral may also be impaired in the event the broker fails to comply with the terms of the contract. In such instances the Fund may not be able to substitute or sell the pledged collateral. Additionally, the Fund must maintain sufficient liquid assets (less any additional collateral pledged to the broker), marked-to-market daily, to cover the short sale obligations. This may limit the Fund's investment flexibility, as well as its ability to meet redemption requests or other current obligations. Because losses on short sales arise from increases in the value of the security sold short, such losses are theoretically unlimited.

Small- and Mid-Capitalization Stock Risk: The earnings and prospects of small and medium sized companies are more volatile than larger companies and may experience higher failure rates than larger companies. Small and medium sized companies normally have a lower trading volume than larger companies, which may tend to make their market price fall more disproportionately than larger companies in response to selling pressures and may have limited markets, product lines, or financial resources and lack management experience.

Technology Sector Risk: Technology companies face intense competition, both domestically and internationally, which may have an adverse effect on profit margins. Technology companies may have limited product lines, markets, financial resources or personnel. The products of technology companies may face obsolescence due to rapid technological developments and frequent new product introduction, unpredictable changes in growth rates and competition for the services of qualified personnel. Companies in the technology sector are heavily dependent on patent and intellectual property rights. The loss or impairment of these rights may adversely affect the profitability of these companies.

Turnover Risk: A higher portfolio turnover will result in higher transactional and brokerage costs. Active trading of securities may also increase the Fund's realized capital gains or losses, which may affect the taxes you pay as a Fund shareholder.

COVID-19 Risk: An outbreak of infectious respiratory illness caused by the novel coronavirus known as COVID-19 has resulted in travel restrictions, closed international borders, enhanced health screenings, disruption and delays in healthcare services, prolonged quarantines, cancellations, temporary store closures, social distancing, government ordered curfews and business closures, disruptions to supply chains and consumer activity, shortages, highly volatile financial markets, and general concern and uncertainty. The impact of COVID-19, and other infectious illness outbreaks that may arise in the future, could adversely affect the economies and capital markets of many nations or the entire global economy, as well as individual companies, entire sectors, and securities and commodities markets (including liquidity), in ways that may not necessarily be foreseen at the present time. COVID-19 and other health crises in the future may exacerbate other pre-existing political, social and economic risks, and its impact in developing or emerging market countries may be greater due to less established health care systems. The duration and ultimate impact of the current outbreak is not known. There is a risk that you may lose money by investing in the Fund.

TEMPORARY INVESTMENTS:

To respond to adverse market, economic, political or other conditions, the Fund may invest 100% of its total assets, without limitation, in high-quality short-term debt securities and money market instruments. These short-term debt securities and money market instruments include: shares of money market mutual

funds, commercial paper, certificates of deposit, bankers' acceptances, U.S. Government securities and repurchase agreements. While a Fund is in a defensive position, the opportunity to achieve its investment objective will be limited. Furthermore, to the extent that the Fund invests in money market mutual funds for cash positions, there will be some duplication of expenses because the Fund pays its pro-rata portion of such money market funds' advisory fees and operational fees.

PORTFOLIO HOLDINGS DISCLOSURE:

A description of the Fund's policies regarding the release of portfolio holdings information is available in the Fund's Statement of Additional Information.

CYBERSECURITY:

The computer systems, networks and devices used by the Fund and its service providers to carry out routine business operations employ a variety of protections designed to prevent damage or interruption from computer viruses, network failures, computer and telecommunication failures, infiltration by unauthorized persons and security breaches. Despite the various protections utilized by the Fund and its service providers, systems, networks, or devices potentially can be breached.

The Fund and its shareholders could be negatively impacted as a result of a cybersecurity breach. Cybersecurity breaches can include unauthorized access to systems, networks, or devices; infection from computer viruses or other malicious software code; and attacks that shut down, disable, slow, or otherwise disrupt operations, business processes, or website access or functionality. Cybersecurity breaches may cause disruptions and impact the Fund's business operations, potentially resulting in financial losses; interference with the Fund's ability to calculate their NAV; impediments to trading; the inability of the Funds, the adviser, the sub-adviser, and other service providers to transact business; violations of applicable privacy and other laws; regulatory fines, penalties, reputational damage, reimbursement or other compensation costs, or additional compliance costs; as well as the inadvertent release of confidential information.

Similar adverse consequences could result from cybersecurity breaches affecting issuers of securities in which the Funds invest; counterparties with which the Funds engage in transactions; governmental and other regulatory authorities; exchange and other financial market operators, banks, brokers, dealers, insurance companies, and other financial institutions (including financial intermediaries and service providers for the Funds' shareholders); and other parties. In addition, substantial costs may be incurred by these entities in order to prevent any cybersecurity breaches in the future.

MANAGEMENT

INVESTMENT ADVISER:

Wrona Investment Management, LLC, (the "Adviser"), located at 400 Linden Rd, Pinehurst, NC, 28374 serves as investment adviser to the Fund. Subject to the authority of the Board of Trustees, the Adviser is responsible for the overall management of the Fund's investment portfolio. The Adviser is a Delaware limited liability company formed in 2019 to provide investment advisory services to individual clients. As of March 1, 2024 the Adviser had approximately \$17.6 million in assets under management.

Pursuant to a management agreement (the "Management Agreement"), the Fund pays the Adviser, on a monthly basis, an annual advisory fee equivalent to 1.00% of the Fund's average daily net assets. The Adviser has contractually agreed to reduce its fees and to reimburse expenses, at least through December 31, 2024 to ensure that total annual Fund operating expenses after fee waiver and reimbursement (acquired fund fees and expenses, interest expenses, dividend expenses on short sales, taxes, brokerage commissions, expenses incurred in connection with any merger or reorganization, or extraordinary expenses such as litigation) will not exceed 1.75% for shares of the average daily net assets. During the fiscal year ended November 30, 2023, the Adviser earned a fee equal to 0.95% of the average daily net assets of the Fund, after fee waivers and reimbursements.

The fee waiver and expense reimbursement is subject to possible recoupment from the Fund within three years after the date on which the waiver or reimbursement occurs, if such recoupment can be achieved within the lesser of the foregoing expense limit or the expense limits in place at the time of recoupment. This agreement may be terminated only by the Fund's Board of Trustees, on 60 days' written notice to Adviser. Fee waiver and reimbursement arrangements can decrease the Fund's expenses and boost its performance. A discussion regarding the basis for the Board of Trustees' approval of the Management Agreement is available in the Fund's annual shareholder report to shareholders dated November 30, 2023.

PORTFOLIO MANAGER:

Jeffrey Wrona has been the portfolio manager of the Fund since its inception in March 2020. He founded Wrona Investment Management, LLC in 2019 and serves as the firm's President, Portfolio Manager, and CCO. Mr. Wrona has managed his family's portfolio since 2001. Mr. Wrona was a Portfolio Manager at Pilgrim Baxter & Associates from 1997 to 2001. Mr. Wrona was also a Portfolio Manager and Securities Analyst at Munder Capital Management from 1990 to 1997. Mr. Wrona has over 30 years of investment experience in the public securities markets. Please refer to the SAI for additional information about the Mr. Wrona's compensation, other accounts managed and ownership of shares of the Fund.

HOW SHARES ARE PRICED

The Fund's assets are generally valued at their market value using market quotations. The Fund may use pricing services to determine market value. If market prices are not available or, in the Adviser's opinion, market prices do not reflect fair value, or if an event occurs after the close of trading on the domestic or foreign exchange or market on which the security is principally traded (but prior to the time the NAV is calculated) that materially affects fair value, the investment Adviser will value the Fund's assets at their fair value according to policies approved by the Fund's Board of Trustees. For example, if trading in a portfolio security is halted and does not resume before the Fund calculates its NAV, the adviser may need to price the security using the Fund's fair value pricing guidelines. Without a fair value price, short term traders could take advantage of the arbitrage opportunity and dilute the NAV of long term investors. Securities trading on overseas markets present time zone arbitrage opportunities when events affecting portfolio security values occur after the close of the overseas market, but prior to the close of the U.S. market. Fair valuation of the Fund's portfolio securities can serve to reduce arbitrage opportunities available to short term traders, but there is no assurance that fair value pricing policies will prevent dilution of a Fund's NAV by short term traders. Fair valuation involves subjective judgments and it is possible that the fair value determined for a security may differ materially from the value that could be realized upon the sale of the security. The Fund may invest in ETFs and other investment companies ("Underlying Funds"). The Fund's NAV is calculated based, in part, upon the market prices of the Underlying Funds in its portfolio, and the prospectuses of those companies explain the circumstances

under which they will use fair value pricing and the effects of using fair value pricing. Because foreign securities trade on days when the Fund's shares are not priced, the value of securities held by the Fund can change on days when the Fund's shares cannot be purchased or redeemed.

HOW TO PURCHASE SHARES

Shares

Shares of the Fund are sold at NAV without an initial sales charge. This means that 100% of your initial investment is placed into shares of the Fund.

MINIMUM INVESTMENTS:

The minimum initial and subsequent investment for Fund shares is \$2,000 and \$100 for all non-retirement accounts. The minimum initial and subsequent investment for retirement accounts is \$2,000 and \$100. However, the Fund or the adviser may waive any minimum investment requirement at its discretion.

There is no minimum investment requirement when you are buying shares by reinvesting dividends and distributions from the Fund. Investment minimums may be higher or lower for investors purchasing shares through a brokerage firm or other financial institution. To the extent investments of individual investors are aggregated into an omnibus account established by an investment adviser, brokerage firm, retirement plan sponsor or other intermediary, the account minimums apply to the omnibus account, not to the account of the individual investor.

For accounts sold through brokerage firms and other intermediaries, it is the responsibility of the brokerage firm or intermediary to enforce compliance with investment minimums.

OPENING AN ACCOUNT:

The Fund is a separate series of MSS Series Trust (the "Trust"), and you may purchase shares directly from the Fund. You also may purchase shares through a brokerage firm or other intermediary that has contracted with the Trust to sell shares of the Fund. You may be charged a separate fee by the brokerage firm or other intermediary through whom you purchase shares.

If you are investing directly in the Fund for the first time, please call the Fund's transfer agent at 1-800-564-3899 to request a Shareholder Account Application or visit www.onerockfund.com. You will need to establish an account before investing. Be sure to sign up for all the account options that you plan to take advantage of. For example, if you would like to be able to redeem your shares by telephone, you should select this option on your Shareholder Account Application. Doing so when you open your account means that you will not need to complete additional paperwork later.

Your investment in the Fund should be intended as a long-term investment vehicle. The Fund is not designed to provide you with a means of speculating on the short-term fluctuations in the stock market. The Fund reserves the right to reject any purchase request that it regards as disruptive to the efficient management of the Fund, which includes investors with a history of excessive trading. The Fund also reserves the right to stop offering shares at any time.

To help the government fight the funding of terrorism and money laundering activities, federal law requires all financial institutions to obtain, verify, and record information that identifies each person who opens an account. This means that when you open an account, we will ask for your name, address, date of birth, and other information that will allow us to identify you. We also may ask for other identifying documents or information, and may take additional steps to verify your identity. We may not be able to open your account or complete a transaction for you until we are able to verify your identity.

If you have any questions regarding the Fund, please call 1-800-564-3899.

You may buy shares on any "business day." Business days are Monday through Friday, other than days the New York Stock Exchange (NYSE) is closed, including the following holidays: New Year's Day, Martin Luther King, Jr. Day, Presidents' Day, Good Friday, Memorial Day, Juneteenth, Independence Day, Labor Day, Thanksgiving and Christmas Day.

Shares of the Fund are sold at NAV. The NAV generally is calculated as of the close of trading on the NYSE every day the NYSE is open. The NYSE normally closes at 4:00 p.m. Eastern Time ("ET"). The Fund's NAV is calculated by taking the total value of the Fund's assets, subtracting its liabilities, and then dividing by the total number of shares outstanding, rounded to the nearest cent.

If you are purchasing directly from the Trust, send the completed Shareholder Account Application and a check payable to the Fund in which you are investing to the following address:

MSS Series Trust
c/o Mutual Shareholder Services, LLC
8000 Town Centre Drive, Suite 400
Broadview Heights, OH 44147

Purchase orders received in "proper form" by the Fund's transfer agent before the close of trading on the NYSE will be effective at the NAV next calculated after your order is received. On occasion, the NYSE closes before 4:00 p.m. ET. When that happens, purchase orders received after the NYSE closes will be effective the following business day.

To be in "proper form," the purchase order must include:

- Fund name and account number;
- Account name(s) and address;
- The dollar amount or number of shares you wish to purchase.

The Fund may limit the amount of purchases and refuse to sell to any person.

Method of Payment. All purchases (both initial and subsequent) must be made in U.S. dollars and checks must be drawn on U.S. banks. Cash, credit cards and third party checks will not be accepted. The Fund reserves the right to reject or restrict purchase for any reason, particularly when a shareholder's trading activity suggests that the shareholder may be engaged in market timing or other disruptive trading activities. Third party checks and checks drawn on a non-U.S. financial institution will not be accepted, even if payment may be effected through a U.S. financial institution. Checks made payable to any individual or company and endorsed to MSS Series Trust or the Fund are considered third-party checks.

A \$20 fee will be charged against your account for any payment check returned to the transfer agent or for any incomplete electronic funds transfer, or for insufficient funds, stop payment, closed account or other reasons. If a check does not clear your bank or the Fund is unable to debit your pre-designated bank account on the day of purchase, the Fund reserves the right to cancel the purchase. If your purchase is canceled, you will be responsible for any losses or fees imposed by your bank and losses that may be incurred as a result of a decline in the value of the canceled purchase. Any profit on such cancellation will accrue to the Fund.

If you choose to pay by wire or ACH transfer, you must call the Fund's transfer agent, at 1-800-564-3899 to set up your account, to obtain an account number, and obtain instructions on how to complete the wire or ACH transfer.

Wire or ACH orders will be accepted only on a day on which the Fund, custodian and transfer agent are open for business. A wire or ACH purchase will not be considered made until the wired money and the purchase order are received by the Fund. Any delays that may occur in wiring money, including delays that may occur in processing by the banks, are not the responsibility of the Fund or its transfer agent. The Fund presently does not charge a fee for the receipt of wired funds, but the Fund may charge shareholders for this service in the future.

AUTOMATIC INVESTMENT PLANS:

By completing the Automatic Investment Plan section of the account application, you may make automatic monthly investments (\$100 minimum per purchase) from your bank or savings account.

OTHER PURCHASE INFORMATION:

If your wire or ACH transfer does not clear, you will be responsible for any loss incurred by the Fund. If you are already a shareholder, the Fund can redeem shares from any identically registered account in the Fund as reimbursement for any loss incurred. You may be prohibited or restricted from making future purchases in the Fund.

The Fund may authorize certain brokerage firms and other intermediaries (including its designated correspondents) to accept purchase and redemption orders on its behalf. The Fund is deemed to have received an order when the authorized person or designee receives the order, and the order is processed at the NAV next calculated thereafter. It is the responsibility of the brokerage firm or other intermediary to transmit orders promptly to the Funds' transfer agent.

HOW TO REDEEM SHARES

REDEEMING SHARES:

You may redeem your shares on any business day. Redemption orders received in proper form by the Fund's transfer agent or by a brokerage firm or other intermediary selling Fund shares before 4:00 p.m. ET (or before the NYSE closes if the NYSE closes before 4:00 p.m. ET) will be processed at that day's NAV. Your brokerage firm or intermediary may have an earlier cut-off time.

"Proper form" means your request for redemption must:

- Include the Fund name and account number;
- Include the account name(s) and address;
- State the dollar amount or number of shares you wish to redeem; and
- Be signed by all registered share owner(s) in the exact name(s) and any special capacity in which they are registered.

The Fund may require that the signatures be guaranteed if the mailing address of the account has been changed within 30 days of the redemption request. The Fund also may require that signatures be guaranteed for redemptions of \$25,000 or more. Signature guarantees are for the protection of shareholders. You can obtain a signature guarantee from most banks and securities dealers, but not from a notary public. All documentation requiring a signature guarantee must utilize a New Technology Medallion stamp. For joint accounts, both signatures must be guaranteed. Please call the transfer agent at 1-800-564-3899 if you have questions regarding signature guarantees. At the discretion of the Fund, you may be required to furnish additional legal documents to insure proper authorization. The Fund will not make checks payable to any person other than the shareholder(s) of record.

Shares of the Fund may be redeemed by mail or telephone. You may receive redemption payments in the form of a check or federal wire transfer. A wire transfer fee of \$20 will be charged to defray custodial charges for redemptions paid by wire transfer. Any charges for wire redemptions will be deducted from your account by redemption of shares. If you redeem your shares through a brokerage firm or other intermediary, you may be charged a fee by that institution.

REDEEMING BY MAIL:

You may redeem any part of your account in the Fund by mail at no charge. Your request, in proper form, should be addressed to:

MSS Series Trust
c/o Mutual Shareholder Services, LLC
8000 Town Centre Drive, Suite 400
Broadview Heights, OH 44147

TELEPHONE REDEMPTIONS:

You may redeem any part of your account in a Fund by calling the transfer agent at 1-800-564-3899. You must first complete the Optional Telephone Redemption and Exchange section of the investment application to institute this option. The Fund, the transfer agent and the custodian are not liable for following redemption instructions communicated by telephone to the extent that they reasonably believe the telephone instructions to be genuine. However,

if they do not employ reasonable procedures to confirm that telephone instructions are genuine, they may be liable for any losses due to unauthorized or fraudulent instructions. Procedures employed may include recording telephone instructions and requiring a form of personal identification from the caller.

The Fund may terminate the telephone redemption procedures at any time. During periods of extreme market activity it is possible that shareholders may encounter some difficulty in telephoning the Fund, although neither the Fund nor the transfer agent has ever experienced difficulties in receiving and responding to telephone requests for redemptions or exchanges in a timely fashion. If you are unable to reach the Fund by telephone, you may request a redemption or exchange by mail.

REDEMPTIONS IN KIND:

The Fund reserves the right to honor requests, in regular and stressed market conditions, for redemption or repurchase orders made by a shareholder during any 90-day period by making payment in whole or in part in portfolio securities ("redemption in kind") on the amount of such a request that is large enough to affect operations (that is, on the amount of the request that is greater than the lesser of \$250,000 or 1% of the Fund's net assets at the beginning of the 90-day period). To the extent feasible, a redemption in-kind would be a pro rata allocation of the Fund's portfolio. In-kind redemptions of Fund shares will be redeemed pro rata to the extent that doing so is reasonable and in the best interests of the Fund and its shareholders. The securities will be chosen by the Fund and valued using the same procedures as used in calculating the Fund's NAV. A shareholder may incur transaction expenses in converting these securities to cash.

ADDITIONAL REDEMPTION INFORMATION:

If you are not certain of the redemption requirements, please call the transfer agent at 1-800-564-3899. Redemptions specifying a certain date or share price cannot be accepted and will be returned. The Fund typically expects that it will take up to 5 days following the receipt of your redemption request to pay out redemption proceeds by check or electronic transfer. The Fund typically expects to pay redemptions from cash, cash equivalents, proceeds from the sale of fund shares, any lines of credit and then from the sale of portfolio securities. These redemption payment methods will be used in regular and stressed market conditions. You may be assessed a fee if a Fund incurs bank charges because you request that the Fund re-issue a redemption check. Also, when the NYSE is closed (or when trading is restricted) for any reason other than its customary weekend or holiday closing or under any emergency circumstances, as determined by the Securities and Exchange Commission ("SEC"), the Fund may suspend redemptions or postpone payment dates.

FREQUENT PURCHASES AND REDEMPTIONS OF FUND SHARES

The Fund discourages and does not accommodate market timing. Frequent trading into and out of the Fund can harm all Fund shareholders by disrupting the Fund's investment strategies, increasing Fund expenses, decreasing tax efficiency and diluting the value of shares held by long-term shareholders. The Fund is designed for long-term investors and is not intended for market timing or other disruptive trading activities. Accordingly, the Fund's Board has approved policies that seek to curb these disruptive activities while recognizing that shareholders may have a legitimate need to adjust their Fund investments as their financial needs or circumstances change. The Fund discourages excessive short-term trading in Fund shares and does not intend to accommodate such trading activity by investors. The Fund considers excessive short-term trading to be any pattern of frequent purchases and redemptions of the Fund's shares by an investor or group of investors, acting in concert, that could interfere with the efficient management of the Fund's portfolio or result in increased brokerage and administrative costs. The Fund currently uses several methods to reduce the risk of market timing. These methods include:

- Committing staff to review, on a continuing basis, recent trading activity in order to identify trading activity that may be contrary to the Fund's market timing trading policy;
- Rejecting or limiting specific purchase requests; and
- Rejecting purchase requests from certain investors.

Though these methods involve judgments that are inherently subjective and involve some selectivity in their application, the Fund seeks to make judgments and applications that are consistent with the interests of the Fund's shareholders.

Based on the frequency of redemptions in your account, the Adviser or transfer agent may in its sole discretion determine that your trading activity is detrimental to the Fund as described in the Fund's market timing trading policy and elect to reject or limit the amount, number, frequency or method for requesting future purchases or exchange purchases of the Fund's shares.

The Fund reserves the right to reject or restrict purchase requests for any reason, particularly when the shareholder's trading activity suggests that the shareholder may be engaged in market timing or other disruptive trading activities. Neither the Fund nor the Adviser will be liable for any losses resulting from rejected purchase orders. The Adviser may also bar an investor who has violated these policies (and the investor's financial advisor) from opening new accounts with the Fund.

Although the Fund attempts to limit disruptive trading activities, some investors use a variety of strategies to hide their identities and their trading practices. There can be no guarantee that the Fund will be able to identify or limit these activities. Omnibus account arrangements are common forms of holding shares of the Fund. While the Fund will encourage financial intermediaries to apply the Fund's market timing trading policy to their customers who invest indirectly in the Fund, the Fund is limited in their ability to monitor the trading activity or enforce the Fund's market timing trading policy with respect to customers of financial intermediaries. For example, should it occur, the Fund may not be able to detect market timing that may be facilitated by financial intermediaries or made difficult to identify in the omnibus accounts used by those intermediaries for aggregated purchases, exchanges and redemptions on behalf of all their customers. More specifically, unless the financial intermediaries have the ability to apply the Fund's market timing trading policy to their customers through such methods as implementing short-term trading limitations or restrictions and monitoring trading activity for what might be market timing, the Fund may not be able to determine whether trading by customers of financial intermediaries is contrary to the Fund's market timing trading policy. Brokers maintaining omnibus accounts with the Fund have agreed to provide shareholder transaction information to the extent known to the broker to the Fund upon request. If the Fund or its transfer agent or shareholder servicing agent suspects there is market timing activity in the account, the Fund will seek full cooperation from the service provider maintaining the account to identify the underlying participant. At the request of the Adviser, the service providers may take immediate action to stop any further short-term trading by such participants.

The Fund and the Adviser reserve the right to modify any redemption fee at any time. If there is a material change to the Fund's redemption fee, the Fund will notify you at least 60 days prior to the effective date of the change.

DIVIDENDS, DISTRIBUTIONS AND TAXES

DIVIDENDS AND DISTRIBUTIONS:

The Fund typically distributes substantially all of its net investment income in the form of dividends and taxable capital gains to its shareholders. The Fund intends to distribute net investment income dividends quarterly and long-term capital gains annually. These distributions are automatically reinvested in the Fund from which they are paid unless you request cash distributions on your application or through a written request to the Fund. Reinvested dividends and distributions receive the same tax treatment as those paid in cash. If you are interested in changing your election, you may call the Fund's transfer agent at 1-800-564-3899 or send a written notification to:

One Rock Fund
c/o Mutual Shareholder Services, LLC
8000 Town Centre Drive, Suite 400
Broadview Heights, OH 44147

TAXES:

In general, selling shares of the Fund and receiving distributions (whether reinvested or taken in cash) are taxable events. Depending on the purchase price and the sale price, you may have a gain or a loss on any shares sold. Any tax liabilities generated by your transactions or by receiving distributions are your responsibility. The Fund anticipates that distributions will be primarily taxed as ordinary income. You may want to avoid making a substantial investment when the Fund is about to make a taxable distribution because you would be responsible for any taxes on the distribution regardless of how long you have owned your shares. The Fund may produce capital gains even if it does not have income to distribute and performance has been poor.

Early each year, the Fund will mail to you a statement setting forth the federal income tax information for all distributions made during the previous year. If you do not provide your taxpayer identification number, your account will be subject to backup withholding.

The tax considerations described in this section do not apply to tax-deferred accounts or other non-taxable entities. Because each investor's tax circumstances are unique, please consult with your tax adviser about your investment.

DISTRIBUTION OF SHARES

ADDITIONAL COMPENSATION TO FINANCIAL INTERMEDIARIES:

The Fund's distributor, its affiliates, and the Adviser may each, at its own expense and out of its own legitimate profits, provide additional cash payments to financial intermediaries who sell shares of the Fund. Financial intermediaries include brokers, financial planners, banks, insurance companies, retirement or 401(k) plan administrators and others. These payments may be in addition to the 12b-1 Fees and any sales charge that are disclosed elsewhere in this Prospectus. These payments are generally made to financial intermediaries that provide shareholder or administrative services, or marketing support. Marketing support may include access to sales meetings, sales representatives and financial intermediary management representatives, inclusion of the Fund on a sales list, including a preferred or select sales list, or other sales programs. These payments also may be made as a expense reimbursement in cases where the financial intermediary provides shareholder services to Fund shareholders.

HOUSEHOLDING:

To reduce expenses, we mail only one copy of the prospectus and each annual and semi-annual report to those addresses shared by two or more accounts. If you wish to receive individual copies of these documents, please call the Fund at 1-800-564-3899 on days the Fund is open for business or contact your financial institution. We will begin sending you individual copies thirty days after receiving your request.

FINANCIAL HIGHLIGHTS

The Financial Highlights table is intended to help you understand the Fund's financial performance during the period of its operations. Certain financial information reflects financial results for a single Fund share. The total returns in the table represent the rate that an investor would have earned (or lost) on an investment in the Fund (assuming reinvestment of all dividends and distributions). This information has been audited by Sanville & Company, whose report, along with the Fund's financial statements, are included in the Fund's annual report, which is available upon request.

Total Return ***	42.97%	(39.91)%	44.94%	96.40% ^(b)
Ratios/Supplemental Data:				
Net Assets at End of Period/Year (Thousands)	\$ 13,507	\$ 8,938	\$ 10,275	\$ 5,540
Before Waiver				
Ratio of Expenses to Average Net Assets ^{(a)(d)}	1.81%	2.12%	2.16%	2.78% ^(c)
Ratio of Net Investment Loss to Average Net Assets ^(a)	(1.31)%	(1.81)%	(1.90)%	(2.31)% ^(c)
After Waiver				
Ratio of Expenses to Average Net Assets ^{(a)(d)}	1.76%	1.75%	1.75%	1.75% ^(c)
Ratio of Net Investment Loss to Average Net Assets ^(a)	(1.26)%	(1.44)%	(1.50)%	(1.28)% ^(c)
Portfolio Turnover	676.38%	687.21%	810.44%	651.69% ^(b)

(a) Does not include expenses of underlying investment companies in which the Fund invests.

(b) Not annualized.

(c) Annualized.

(d) Includes 0.01%, less than 0.005%, and less than 0.005% of interest expenses for the years ended November 30, 2023 and 2021, and the period ended November 30, 2020, respectively.

* For the period March 6, 2020 (commencement of investment operations) through November 30, 2020.

** Per share net investment loss has been determined on the basis of average shares outstanding during the period.

*** Total return in the above table represents the rate that the investor would have earned or lost on an investment in the Fund assuming reinvestment of dividends. Returns would have been lower had the advisor not reimbursed expenses/waived fees during the period.

PRIVACY NOTICE

MSS SERIES TRUST

FACTS	WHAT DOES THE MSS SERIES TRUST DO WITH YOUR PERSONAL INFORMATION?
--------------	--

Why?	Financial companies choose how they share your personal information. Federal law gives consumers the right to limit some, but not all sharing. Federal law also requires us to tell you how we collect, share, and protect your personal information. Please read this notice carefully to understand what we do.

FOR MORE INFORMATION

Additional information about the Fund is included in the Fund's Statement of Additional Information dated March 28, 2024. The Statement of Additional Information ("SAI"), incorporated into this Prospectus by reference (and therefore legally a part of this Prospectus), contains detailed information on Fund policies and operations, including policies and procedures relating to the disclosure of portfolio holdings by the Fund's affiliates. Annual reports will, and the semi-annual reports may, contain management's discussion of market conditions and investment strategies that significantly affected the performance results of the Fund as of the latest semi-annual or annual fiscal year end.

Call the Fund at 1-800-564-3899 to request free copies of the SAI, the annual report and the semi-annual report, to request other information about the Fund and to make shareholder inquiries. You may also obtain this information about the Fund at the internet site www.onerockfund.com.

You also may obtain reports and other information about the Fund on the EDGAR Database on the SEC's Internet site at <http://www.sec.gov>, and copies of this information may be obtained, after paying a duplicating fee, by electronic request at the following e-mail address: publicinfo@sec.gov.
